Goals for Week 2

Week 2: DOM Manipulation · Lesson 1 ·

✓ Completed

Lesson Notes

Discussion (9)

Let's look at what we're doing this week. This week, we'll learn how to manipulate the DOM (don't worry, you'll soon find out what that is). We'll learn this while working on a GIF search engine. By the end of the week, you'll be well acquainted with these terms: innerHTML, querySelector, getElementById, addEventListener, DOM manipulation, keyCode, AJAX, JSON.parse, forEach, API documentation.
