Time to do some work, everyone.

# Your Assignment

1. On the Oprah app, right now if "Chris" comes to the site he gets a car. Write the code so that if "Chris" and YOU come to the site we both get cars. But no one else gets cars! Just you and me. (hint: else if)
2. Show images for three cars in addition to the car names. You're not just displaying three cars all at once, but rather I want to see one car image display at the same time as the car name.
3. Make your own randomizer app!
