Week 2: DOM Manipulation · Lesson 18 ·

Lesson Notes

Discussion (87)

It's that time of the week again!

Finish the GIF search engine

You can use the following videos on functions, loops and setTimeout() for some code help!

Giphy TV (Bonus HW Assignment)

Create an app that displays one GIF after another just like watching TV. It doesn't need to go endlessly, it could just be 5 GIFS that play one after another.

This is possible using the current GIPHY Api:

```
http://api.giphy.com/v1/gifs/search?  
q=funny+cat&api_key=dc6zaT0xFJmzC
```

Or by using this special GIF API:

```
tv.giphy.com/v1/gifs/tv?api_key=CW27AW0nlp5u0&tag=giphytv
```
