Create a Function Called howManyLetters

✓ Completed

Week 2: DOM Manipulation · Lesson 8 ·

[Lesson Notes](#)

[Discussion \(28\)](#)

You'll be given another challenge. Again, try to work through it on your own before watching the solution.

```
<!DOCTYPE html>
<html>
<head>
  <title>How Many Letters</title>
</head>
<body>

<script type="text/javascript">

  function howManyLetters(x) {
    var answer = x.length;
    document.write(answer);
  }

  howManyLetters("Chris");

</script>
</body>
</html>
```
